

Differentiate between let, const, and var

keywords	const	let	var
Declaration	Declared with the const keyword	Declared with let keyword	Declared with var keyword
Redeclaration	When a const is declared with a certain name, it cannot be redeclared with the same name again.	Same with const, it name when declared cannot be redeclared	A declared var can be redeclared
Reassignment	It cannot be reassigned a value once initialized a value	It can be reassigned a value once initialized a value	It can be reassigned a value once initialized a value
